

## “OBTAINING ETHICAL PERMISSION FOR THESES AND RESEARCH PROJECTS”

All of the TUMS research projects and theses which conduct research on **human or animal models** need to obtain an ETHICAL PERMISSION, in addition to other approvals required by the TUMS regulations.

The process of obtaining an ethical permission:

- 1- Proposal registration in the Pajoooheshyar System by the student,
- 2- Sending the proposal to the Ethical Committee by the research officer through the Pajoooheshyar System,
- 3- Review and evaluation of the proposal in the Ethical Committee. (***This stage may take a relatively long time***),
- 4- Announcement of the final decision to the research officer through the Pajoooheshyar System.

NOTE: A research budget contract is signed with the project managers whose projects are subject to obtaining an Ethical Permission only after they have obtained their ethical permission.
