School of Nursing and Midwifery

Ph.D. in Nursing
(General specifications, plans, and headlines)
Section I
Title: Nursing (Ph.D.)
Degree: Ph.D.

General Competencies

Communication skills, interviewing, reporting, critical thinking, professionalism, and as well as:

- Concept and theories in nursing
- Evidence based practice
- Research methodology in nursing
- Statistics for nursing research

Specific Competencies and Skills (Special Qualifications)

Educational, research, advisory, treatment, caring, prevention
Graduates of this program, as well as resolving the shortness of human resources, will be able to work in the following roles:

Educational Roles

- Reviewing and analyzing training programs
- Participating in the planning at different stages of nursing education
- Teaching at different levels of nursing education using modern methods
- Participating in the development programs and teaching continuous education programs for clinical staff
- Planning and supervising postgraduates’ clinical training at different levels in accordance with the standards

Research Roles
• Conduct qualitative and quantitative research according to the needs of community and priorities
• Guide and advice thesis and dissertation for postgraduate students
• Review and modify research projects
• Cooperation with the research committees at research, health, and treatment centers
• Review clinical needs and provide proposal and research projects in order to solve the problem
• Encourage and support students and research committees with the advice and guidance in required researches

Preventive and Consultancy Roles
Guidance and partnership with students at health centers in:
• Assessment of mental and physical diseases (acute and chronic) in that area
• Prevention and counseling patients and their families about illnesses
• Assessment of clients and their families’ social problems such as addiction, crime, etc.
• Education of patients and their families on prevention and providing ongoing advisory services to individuals
• Follow-up patients and families in the community to assess the measures taken

Their Role in Diagnosis, Treatment, and Care
Providing guidance and help for students in clinical education with respect to the following factors:
• The importance of discharge planning from the time of admission
• Assess and understand the needs and conditions of the patient (client)
• Planning and providing care based on nursing diagnoses, according to priorities
• Evaluating delivered care
• Teaching patients and family
• Report interventions in writing and verbally
• If necessary, follow-up patients after discharge (in the community)
• Guiding students on how to communicate with patients and families
• Providing assistance in planning and implementing continuous education in hospital
• Cooperating with hospital committees
• Provide clinical conferences needed to improve the quality of service (e.g., infection control)
• Conducting workshops in collaboration with the nursing staff and students

Managerial Roles
• Reviewing and understanding of the organization's management structure
• Identifying shortages, limitations and problems of organization
• Strategic planning by using opportunities and resources
• Providing professional services by offering related proposals
• Assessing and understanding problems in specialized field (associated with thesis)
• Participating in planning and implementation of internal and external evaluation and audit

Educational Strategies, Methods, and Techniques

Educational Strategies: task based learning, blended learning (teacher-centered and student-centered), blended learning (attendance and DLN), problem based learning; professional competency based learning, and evidence based learning

Methods and Techniques: lecture (question and answer, video clip), journal club, case presentation, discussion in small groups, Seminars and conferences, site visits (for example, Nursing Office of the Tehran University of Medical Sciences, and Iranian Nursing Organization), clinical and managerial practice in health care fields

• Student-centered teaching
• Using problem-solving method in teaching
• Using group discussion in teaching
• Promoting critical thinking through teaching
• Students must write down scientific and research findings related to each lesson

Student Assessment

• Written evaluation [multiple choice questions (MCQ), essay (restricted and extended answer)], oral evaluation (unstructured and structured oral exams), interactive computer test, practical evaluation (projects, portfolio, and logbook)

The Terms and Conditions of Admission to the Course

Applicants must hold a master’s degree certificate in nursing management or related programs. They must also meet other requirements for entry to Ph.D. programs approved by the High Council of Planning.
