

I. Extra-ocular Surgeries
A) Eyelid Surgeries (at least 30 surgeries)

Surgeries	Available in the Second Year of Residency	Available in the Third and Fourth Year of Residency	Resident can Only Help Surgeons
Repair of simple laceration of eyelid and conjunctiva	*		
Eyelid and conjunctival laceration repair		*	
Chalazion removal	*		
Simple surgical ptosis		*	
Surgery of congenital ptosis			*
Removal of periorbital simple tumors		*	
Blepharoplasty, eyelid reconstruction			*
Tarsoraphy		*	
Blepharoraphy			*
Entropion and ectropion surgery			*
Eyelid retraction surgery			*
Canthoplasty			*

B) Lacrimal System Surgeries (15 surgeries)

Surgeries	Available in the Second Year of Residency	Available in the Third and Fourth Year of Residency	Resident can Only Help Surgeons
Canalicular laceration repair		*	
Plugging of lacrimal punctum	*		
Probing		*	
Silicon tube		*	
Dacryocystorhinostomy (DCR)		*	

C) Orbital Surgeries (at least 10 procedures)

Surgeries	Available in the Second Year of Residency	Available in the Third and Fourth Year of Residency	Resident can Only Help Surgeons
Orbital fractures repair			*
Orbitotomy (to remove the tumor, foreign body, abscesses etc.)			*
Evisceration	*		
Enucleation		*	
Exenteration			*
Orbital decompression			*
Socket repair			*
Excision of conjunctival tumors with or without cryotherapy		*	
Optic nerve decompression			*

D) Strabismus Surgeries (15 procedures)

Surgeries	Available in the Second Year of Residency	Available in the Third and Fourth Year of Residency	Resident can Only Help Surgeons
Horizontal rectus muscle surgery	*		
Vertical rectus muscle and the inferior oblique muscle surgery		*	
Superior oblique muscle surgery			*
Adjustable suture surgery			*
Strabismus reoperation			
Muscle transposition surgery			*
Injection of botulinum A toxin		*	
Surgery for nystagmus (in large recess cases)			*

II. Intraocular Surgery

A) Anterior Segment Surgery (at least 120 procedures)

Surgeries	Available in the Second Year of Residency	Available in the Third and Fourth Year of Residency	Resident can Only Help Surgeons
Extracapsular cataract extraction		*	
Phacoemulsification	*		
Lensectomy			
Lens removal in subluxated cases			*
Lensectomy in traumatic cataract with corneal laceration		*	
Laser capsulotomy	*		
Secondary IOL implantation		*	
Replacement intraocular lens (IOL)		*	
Anterior vitrectomy (for vitreous extraction after cataract surgery)		*	
Corneal Surgery			
Conjunctival flap		*	
Amniotic membrane transplantation		*	
Penetrating keratoplasty			*
Superficial keratectomy (SK)		*	
DSEAK		*	
Simple corneal laceration repair		*	
Complex corneal laceration repair		*	
Refractive Surgery Using Laser			
Surface ablation in simple myopia		*	
LASIK in simple myopia		*	
Collagen cross-linking		*	

Other Anterior Segment Surgery			
AC washing		*	
Anterior vitrectomy - limbal		*	
Simple pterygium surgery		*	
Complex pterygium surgery			*

B) Glaucoma Surgery (at least 30 surgery)

Surgeries	Available in the Second Year of Residency	Available in the Third and Fourth Year of Residency	Resident can Only Help Surgeons
Filtering surgery			
Trabeculectomy in adults		*	
Trabeculectomy in children			*
Re-trabeculectomy		*	
Trabeculotomy			*
Cataract surgery after glaucoma surgery		*	
Cataract surgery combined with glaucoma surgery		*	
Goniotomy			*
Choroidal tap		*	
Shunt placement			*
Endoscopic photocoagulation			
Non-penetrating glaucoma surgery			
Panretinal photocoagulation	*		
Laser for macular edema			*
Scleral buckling	*		
Core vitrectomy			*
Pars plana vitrectomy			*
Silicone oil removal		*
