1 July, 2019

Dear Dr Vahid Salimi,

On behalf of the Scientific Committee, we are pleased to inform you that your abstract has been accepted for **Poster Discussion** at the **"RSVVW 2019 - A Global Conference on Novel Therapeutic and Preventive Interventions"** organized by the ReSViNET Foundation to be held in Accra, Ghana on **November 12th - 14th November, 2019 at the Mövenpick Ambassador Hotel Accra.**

Abstract Title: Investigation of the effects of hyperglycemia on the immunopathogenesis of respiratory syncytial virus in mouse model

The main goal of this conference is to offer a platform for updates relevant to the RSV community, with a focus around interventions for RSV prevention and treatment. We aim to bring together stakeholders involved in RSV research such as scientists, physicians, pharmaceutical companies, and representatives from FDA, PATH, WHO, EMA, NIH, and BMGF to discuss updates and next steps to advance interventions against RSV disease.

Ghana is one of the most peaceful countries in Africa and a tourism hub for the continent. Accra is a city full of life and excitement with a prodigious history, monuments, cultural diversity, arts and crafts, and more.

All additional information and tips regarding travel, visiting Ghana, and conference details will be posted throughout the upcoming months on our website. Make sure to stay updated by checking our website frequently.

If you have any additional questions, please don't hesitate to contact us. We look forward to meet you in Accra.

Thank you and best wishes,

Anna Vera Verschuur and Leyla Kragten-Tabatabaie

also on behalf of the Organizing Committee
