27/06/2018

Dear Dr. Rasoul Aliannejad,

We are pleased to inform you that your abstract entitled:

"Exhaled nitric oxide in mustard airway disease"

has been selected for presentation in Thematic poster at the ERS Paris 2018 International Congress entitled:

"Occupational and environmental lung diseases: influence on the airway and interstitium"

The session will be held on 16/09/2018 from 12:50 to 14:40 in TP-29.

Read carefully the instructions on how to prepare your abstract presentation on our website:

<https://erscongress.org/programme-2018/information-for-faculty-and-abstract-authors.html>

In order to increase the visibility of your accepted abstract at the congress, you will be encouraged to create an electronic version of the abstract, called **E-Poster**. All abstracts and E-Posters will be available on the Congress App, which will also be available on site from the Congress Resources areas. In August you will be able to upload an E-Poster on your myERS account as well as E-Poster creation guidelines and poster models will be provided to help you in the process.

N.B. the creation of E-Poster is recommended for all accepted abstracts.

We would like to point out that:

1. At least one of the authors (the presenting author) must be a registered as participant at the Congress. In order to register, please go to: <https://erscongress.org/registration-2018.html>
2. No change can be made to the abstracts
3. Real or perceived conflicts of interest that relate to your presentation have to be disclosed when presenting your abstract (on poster or on slide presentation) and on your E-Poster.
4. If, for any reason, you have to cancel your presentation, it is important that you notify us immediately. Please use the following contact details:
 - To cancel your abstract presentation both in the *Programme* and the *Abstract book*:
ERS Scientific Dept. in Lausanne by fax: +41 21 213 01 00; or by e-mail: abstracts@ersnet.org
 - To cancel your registration to the Congress: Congrex Switzerland Ltd by email: ers2018.registration@congrex.com

If you will not be the one presenting the abstract, we would be grateful if you could update this information directly on the abstract platform accessible via myERS portal: <http://my.ersnet.org>

Yours sincerely,

ERS Scientific Programme department on behalf of

Guy Brusselle, Science Council Chair

N.B. No-shows:

Every year, a number of authors with accepted abstracts fail to attend the Congress or to present their work.

We wish to remind you that if you do not show up, or do not have a co-author present in your place, you may not be invited to present your work at future ERS meetings.
