13 May 2013

Prof. Mahvash Salsali

Tehran University of Medical Sciences

and Associate Faculty Member, Alberta University, Faculty of Nursing, Canada

Dear Prof. Salsali,

I am absolutely delighted to accept your poster presentation for our upcoming conference on **Brain Development and Learning: Making Sense of the Science**, July 24-28, 2013, in Vancouver, British Columbia, Canada.

The goal of the conference is to improve children's lives by bringing cutting-edge research on the brain, child development, and mental health to those who work directly with children, especially children at-risk, in ways they can understand, see the immediate relevance of, and use. Your poster, "**Enhance Learning and Critical Thinking through Innovative Teaching**," is not only perfectly in line with the goals of the conference but will enhance the conference by providing valuable information to other attendees.

As my assistant mentioned to you, I believe, there will be a \$50 charge to cover the cost of the poster board. I look forward to meeting you in July. Thank you for submitting your work to our conference.

Sincerely,

A handwritten signature in cursive script that reads 'Adele Diamond'.

Adele Diamond, PhD, FRSC

Chair, Brain Development and Learning Conference Organizing Committee
Canada Research Chair Tier 1 Professor of Developmental Cognitive Neuroscience
